

# Cable Tapes

---

## Polypropylene (PP) Foam tapes

## Polypropylene (PP) Foam tapes

### Description

- ☞ Mono-oriented milky color extruded polypropylene tape
- ☞ Soft, smooth and strong
- ☞ Low density and high mechanical strength
- ☞ High and constant quality & smooth surface
- ☞ Easy processable and folding to ensure high speed processes
- ☞ Long production lengths on pads or spools
- ☞ Also available with PET-film layer for easy strip purposes

### Application

- ☞ Binding and separation tape of mainly power, data and special cable constructions
- ☞ Between cable segment or under / over sheath or armour for protection during (indoor) transport
- ☞ Apply tape either longitudinal or hellenical

<i>Class</i>	<i>Grade</i>	<i>Thickness (mm)</i>	<i>Tensile strength (N/mm<sup>2</sup>)</i>	<i>Elongation (%)</i>
<i>Standard</i>	<b>HEC-PPF-80</b>	0.080	≥100	≥15
