

**POWERING THE
FUTURE WITH
SUSTAINABLE
MATERIALS**

Shaping a brighter future with sustainable cable solutions

Dedicated in transforming the wire & cable industry with sustainable practices and innovative solutions. As a leading supplier and distributor of cable materials, we understand the pivotal role cables play in modern life. That's why we're committed to offering a wide array of cable solutions that meet today's needs while safeguarding tomorrow's resources.

Our focus on sustainability guides every aspect of our operations. From responsible sourcing to eco-friendly manufacturing processes, we prioritize environmental stewardship to minimize our impact and promote renewable energy.

Through continuous R&D, we stay ahead of the curve, delivering cutting-edge solutions that tailor the needs of the chain.

Join us on our journey to create a brighter future for all.

HEC-Holland

your global partner in cable solutions

Established in 2007, HEC-Holland has been a trusted name in the wire & cable industry for nearly two decades. Headquartered in Arnhem, The Netherlands, we operate as an international supplier of compounds, raw materials, and semi-finished products catering to the diverse needs of cable manufacturers worldwide.

Mission

Our mission is clear: connecting the world's best professionals in the cable industry and inspire the industry in creating high-quality materials and durable products that contribute to making the world a better place. We are committed to providing innovative, high-quality value-added services that meet the evolving needs of our customers while upholding the highest standards of sustainability and excellence.

Respect

Central to our ethos is a profound respect for our relationships—with our customers, suppliers, employees, shareholders, and the community at large. We prioritize transparency, integrity, and trust in all our interactions, fostering long-term partnerships built on mutual respect and shared values.

Global network

Our global network of suppliers and cable professionals forms the backbone of our operations. By partnering with the world's best, we ensure the highest quality materials and services, adding significant value to every link in the chain of the cable industry.

Production warehouse tailored to the customers needs

Make-to-order

HEC-Holland specializes in tailored solutions. We employ a make-to-order strategy to meet your unique cable project requirements.

Converting

Our staff converts tapes & foils in various sizes. Their expertise ensures every product is crafted with precision, delivering tailored solutions.

Labelling

Making sure every order is handled with care, each product is carefully labelled to optimize logistical processes.

Slitting

Our cutting-edge slitting machines slit a broad range of cable tapes & foils: PE, PET, PP-Foam, Mica & Metals, such as Aluminium, Steel & Copper.

Winding

We have excellent winding techniques in-house. Such as winding on standard or specialty bobbins, mother rolls, pads and/or spools.

Packaging & Transport

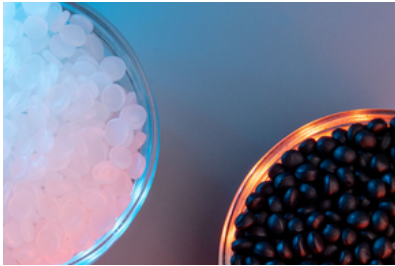

Our converting specialists take care of packaging, storage and transport of each order. Guaranteeing an efficient process.

Our Product Range

for industrial cable applications

HEC-Holland offers a comprehensive range of cable materials, crafted to meet the demanding needs & standards of the wire & cable industry worldwide. From low to extra high voltage land & marine cables to data & OFC cables, our products are engineered to excel in a multitude of conditions & applications.

Our versatile materials find application in various cable applications. Transmitting electricity efficiently, ensuring seamless communication networks, withstanding harsh (marine) environments, harnessing wind energy sustainably, or powering automotive innovations, our products deliver performance and reliability.

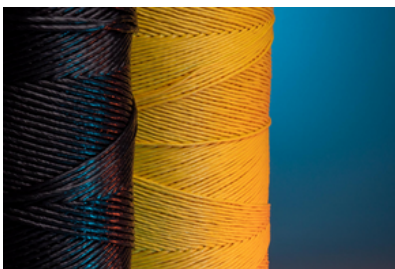

Polyolefins

- Data & Power insulation compounds
- (HFFR) Jacketing & insulation compounds
- PBT compounds
- Base Resins
- EVA

Cable Tapes & Foils

- PE tapes
- PP foam tapes
- Metalized tapes & foils
- Mica tapes

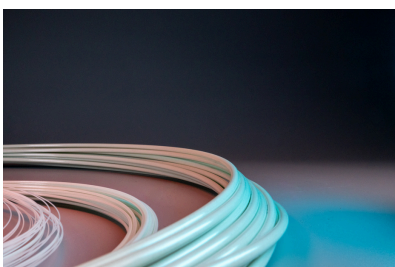

Cable Yarns

- PP yarns
- PE yarns
- Aramid yarns
- Glass yarns

Cable Wires

- Low carbon galvanized steel wires
- High carbon galvanized steel wires
- Braiding wires
- EAA coated galvanized steel wires

Specialties

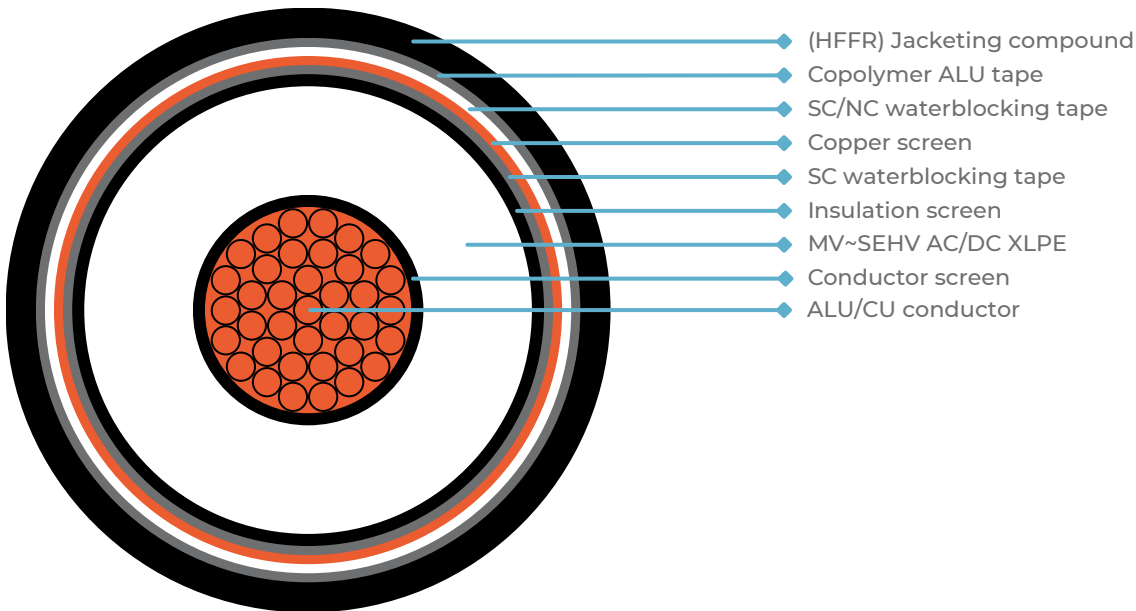

- Superabsorbent Polymer
- Cable Filling Gels
- FRP
- Monofilaments

POWER CABLES

low, medium & high (AC/DC) voltage

The demand for robust, reliable cables for power distribution and transmission capable of withstanding high industrial requirements is increasing, driven by rising market needs and the growing importance of electricity. From low to medium to high voltage applications, the integrity of power cables is paramount for ensuring uninterrupted energy transmission.

At HEC-Holland, we specialize in supplying raw materials and tapes essential for manufacturing these critical components of modern infrastructure. Our extensive range of materials is crafted to meet the stringent standards of the industry, providing optimal performance and durability in even the most demanding environments.

POWER products

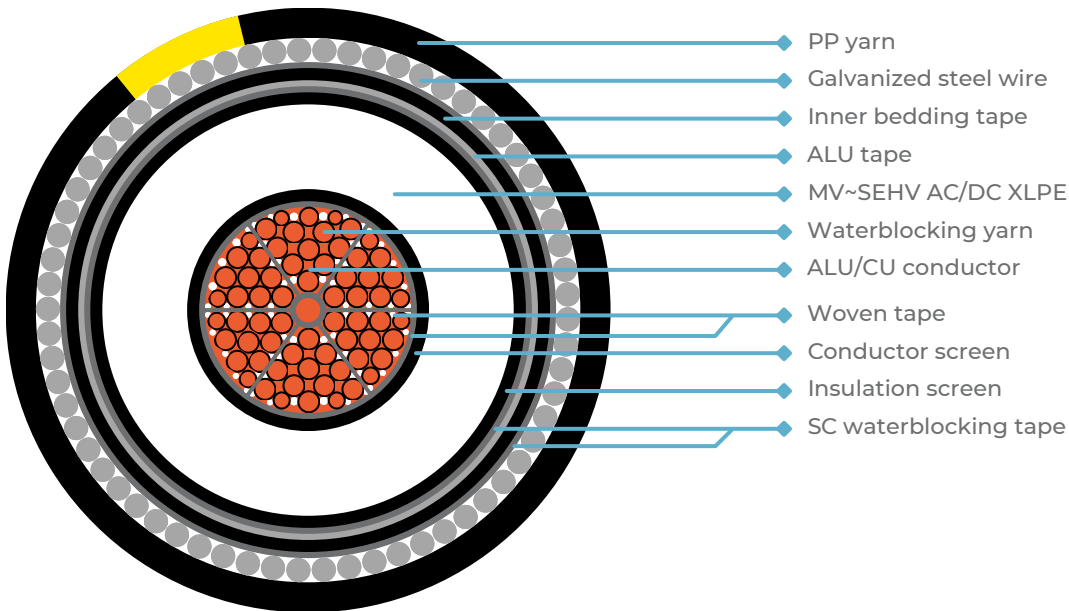

- Power insulation compounds
- (HFFR) Jacketing compounds
- Base resins
- Ethylene-Vinyl Acetates
- Waterblocking tapes
- Bedding, Binding, Separation tapes
- PP foam tapes
- Aluminium tapes and foils
- Yarns (PP, PE, Aramid)
- Galvanized steel wires
- Superabsorbent Polymers

POWER CABLES

submarine

Submarine power cables are the lifelines of offshore energy transmission, requiring exceptional resilience to harsh marine conditions. These cables must withstand extreme pressure, corrosion, and temperature differentials while maintaining uninterrupted power transmission.

At HEC-Holland, we specialize in providing custom raw materials, compounds & semi-finished products to meet these stringent requirements. Our materials are engineered for durability and reliability, ensuring optimal performance in submarine environments. With a focus on innovation and quality, we deliver specialized cable materials designed to meet the unique challenges of underwater power transmission. HEC-Holland provides essential components necessary for powering the future of offshore energy infrastructure.

SUBMARINE products

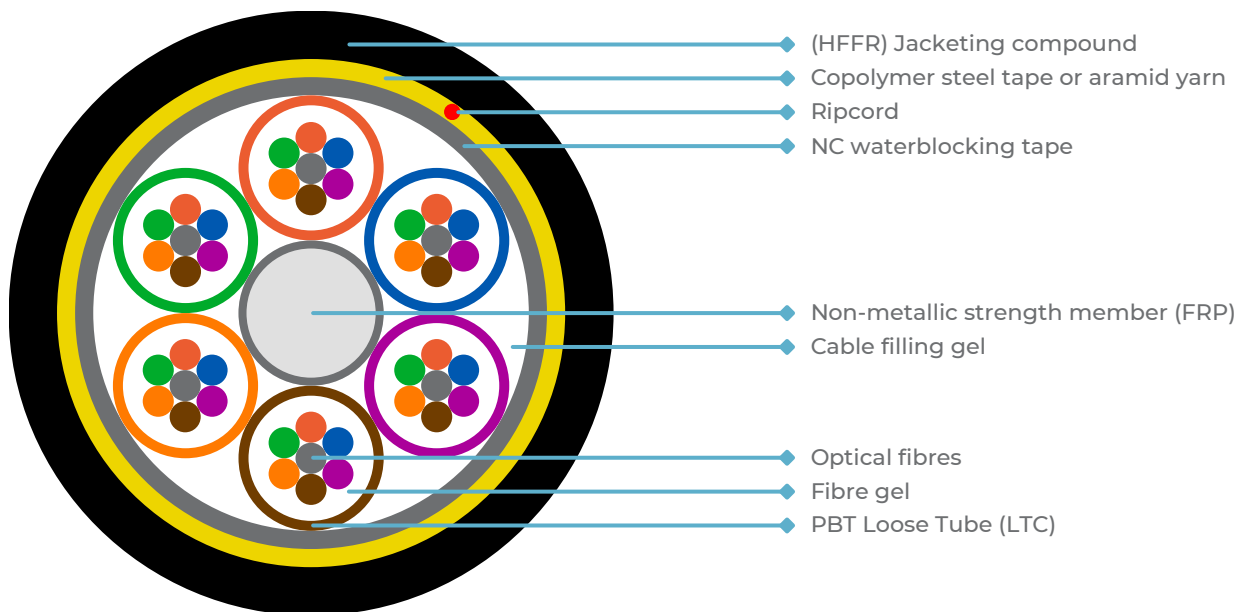

- Power insulation compounds
- (HFFR) Jacketing compounds
- Base resins
- Ethylene-Vinyl Acetates
- Waterblocking tapes
- Bedding, Binding, Separation tapes
- PP foam tapes
- Aluminium tapes and foils
- Yarns (PP, PE, Aramid)
- Galvanized steel wires
- Superabsorbent Polymers

FIBRE OPTIC CABLES

LTC, MUC, STC, CTC

HEC-Holland pioneers in supplying premium fibre optic cable materials, designed to meet modern installation requirements. These materials enable the production of optical fibre cables with features such as small diameter, low weight, and high tensile strength, facilitating easy installation. Compliant with stringent regulations, these cables can be flame-retardant and halogen-free.

We provide tailored material solutions for various requirements and applications, including rodent protection and steel wire armouring. Our materials support the production of universal optical fibre cables, enabling versatility with resistance to humidity and flame-retardant properties, which help reduce splices and installation costs. Additionally, our materials for mini and micro cables are specifically designed for the access market and FTTx applications, ensuring compactness, lightness, and optimal performance in e.g. micro duct systems.

OPTICAL FIBRE products

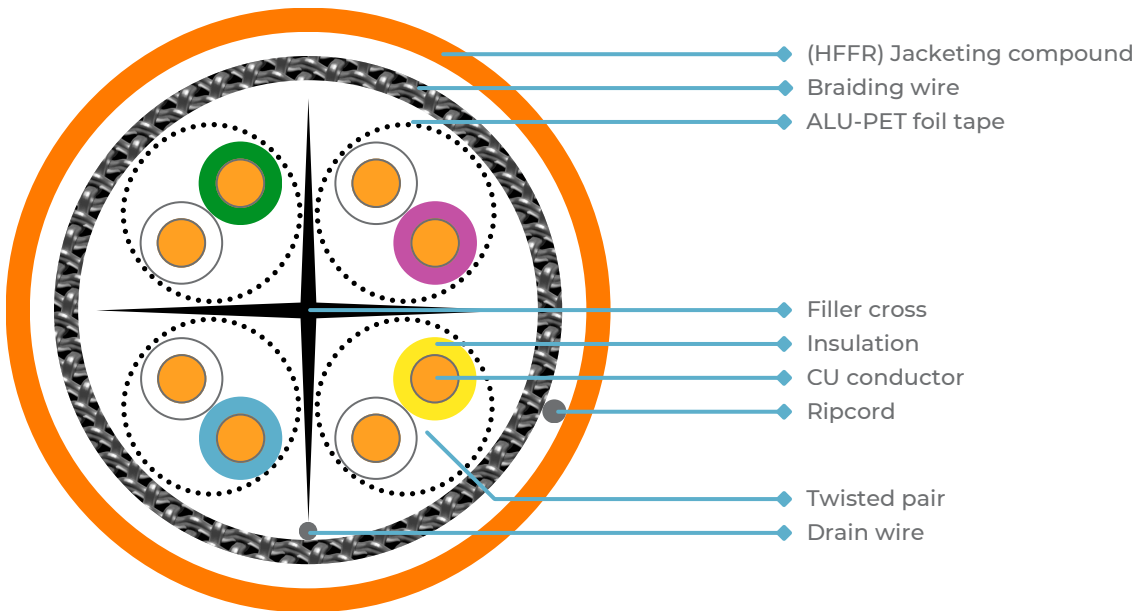

- (HFFR) Jacketing compounds
- PBT compounds
- Waterblocking tapes
- Bedding, Binding tapes
- Aluminium tapes and foils
- Steel tapes
- Yarns (PE, Aramid, Glass)
- Cable filling gels
- Superabsorbent Polymers

DATA COMMUNICATION CABLES

twisted pair, copper & coaxial

We are a leading company in providing advanced insulation and jacketing materials for data cables, which are critical to the industrial cable sector. In today's connectivity-driven world, our compounds help to ensure stable, high-frequency transmissions, supporting the broader bandwidths required by modern network providers. Whether copper multipair or coaxial cables, our materials are designed to meet the ever-changing demands of data transmission.

As digitalization fuels the growth of data centers, our top-tier cable materials play a pivotal role in ensuring uninterrupted operations and meeting stringent safety standards. Our cable materials provide reliability, interference-free transmissions, safety, and sustainability, essential for powering the digital infrastructure of tomorrow.

DATA COMMUNICATION products

- Data Insulation compounds
- (HFFR) Jacketing compounds
- Base resins
- Ethylene-Vinyl Acetates
- Waterblocking tapes
- Binding tapes
- Steel & Aluminium tapes and foils
- Mica tapes
- PE Yarns
- Braiding & Galvanized steel wires
- Cable filling gels

SPECIALTY CABLES

your cable, our solution

We supply specialized materials for all kinds of industrial cable needs. Ranging from high temperature-resistant cables to those resilient against acids, alkalis, and even termites, our range covers diverse applications. We deliver cable materials for specific applications including automotive, solar, infrastructure, wind power and/or buildings.

Our expertise extends to crafting cables that meet the stringent standard required in shipboard nuclear power plants. With a commitment to quality and innovation, we ensure each cable meets the requirements and standards in even the most demanding environments. Whatever the specialty, HEC-Holland delivers tailored solutions, reinforcing industries delivering excellence, durability, and safety.

HEC-Holland

your preferred supplier

In the dynamic world of cable manufacturing, selecting the right supplier for raw cable materials is paramount. At HEC-Holland, we stand as a beacon of excellence, offering expertise and a commitment to innovation. Here's why you should partner with us for your next cable project:

- **Ample Knowledge and Experience** With years of experience in the wire & cable industry, we deliver invaluable insights and expertise to every project.
- **Tailor-Made Solutions** We understand that one size does not fit all. Our team excels in crafting customized solutions to meet your specific needs and requirements.
- **Customer-Specific Products** From concept to creation, we work closely with our customers to develop products tailored to their unique specifications.
- **Process Optimization** Leveraging the latest technologies and methodologies, we optimize processes to enhance efficiency and quality across the board.
- **Lean Supply Chain Management** Our streamlined supply chain management ensures timely delivery of materials, reducing downtime and maximizing productivity.
- **Own Slitting Service** With our in-house slitting service, we offer precision-cut materials tailored to your exact dimensions, minimizing waste and inefficiency.
- **Own Warehouse & Global Distribution Network** With a warehouse and strong global network of distribution centers strategically located across the globe, we ensure seamless access to materials wherever you are.
- **Dedicated, Strong Partnerships** We believe in forging strong partnerships with both our customers and suppliers, fostering collaboration and mutual success.

HEC-Holland stands as a trusted partner in the wire & cable industry.
